Fremont, CA | 408-429-4502 | enemani3@gatech.edu | [linkedin.com/in/sathwik-nemani](https://www.linkedin.com/in/sathwik-nemani) | US Permanent Resident

EDUCATION

Georgia Institute of Technology — Expected Graduation: May 2026 Atlanta, GA
Bachelor of Science in Computer Science | Threads: Systems Architecture & Intelligence
GPA: 4.0/4.0

- **Relevant Coursework:** Data Structures & Algorithms, Analysis of Algorithms, Computer Organization & Architecture, Objects & Designs, Discrete Math, Perception & Robotics, Linear Algebra, Database Systems

TECHNICAL SKILLS

Languages/Frameworks: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, React, Flask, Assembly, Django
Developer Tools/Libraries: pandas, NumPy, DeepLabCut, Pytorch, TensorFlow, OpenCV, AWS (EC2, S3), Git

EXPERIENCE

Capital One May 2025 – Aug 2025
Software Engineering Intern | Auto Finance Tech

- Built a full-stack address verification feature for the Title Release Payoff flow using **AngularJS** (frontend) and **Spring Boot (Java)** backend, enabling real-time customer updates and accurate title delivery.
- Developed 4 RESTful API endpoints with **98% test coverage**, deployed on the **EASE microservices platform**, and integrated with internal **CI/CD pipelines** and **Splunk** for proactive debugging.
- Queried historical Title Release data using **Snowflake SQL**, refining project logic to cut ~39K agent calls (~6.6% of 592K), improve digital resolution by **35%**, and boost **NPS by +7 points**.
- Presented KPI-aligned demos to engineering leadership, highlighting projected **\$800K+ annual cost savings**, and spearheaded automation efforts recognized for internal impact.
- Worked in **Agile sprints** with a 6-person pod, integrating stakeholder feedback into development roadmaps and iterative system enhancements.

Georgia Tech - CS 2200 Systems and Networks May 2025 - Present
Undergraduate Teaching Assistant

- Instructed and mentored 150+ students in systems fundamentals including processor architecture, memory hierarchy, pipelining, virtual memory, multithreading, scheduling algorithms, and networking protocols.
- Led weekly labs and office hours supporting **C/Python**-based projects and improved grading consistency across 300+ submissions by developing automated test harnesses and validation scripts.

Whiteboard Jan 2024 – Jun 2025
Co-Founder

- Launched a platform to help B2B companies streamline customer support by intelligently synthesizing scattered context—across Slack threads, knowledge bases, and internal tools—into a unified, searchable interface.
- Engineered a Slack-integrated conversation-to-ticket workflow using a full-stack system built with **Node.js**, **TypeScript**, and **MongoDB**, alongside a fine-tuned **LLaMA-based language model** for semantic understanding; reduced inbox clutter by **67%** across 4 pilot customers.
- Led product development and customer pilots, delivering demos, onboarding feedback loops, and iterating on core experience based on early user insights.

Myntor.io July 2023 – Aug 2023
Software Development Intern

- Created an automated data collection system to engage **500+ customers** and record feedback for the product
- Redesigned a discussion board feature to make user-system interactions more personalized and applicable, boosting customer satisfaction, and increasing the customer base by **25%, since deployment**
- Presented feature using **Figma** UI/UX designs to Myntor Product Development and the Board of Directors

PROJECTS

Weave | React Native, SQL, REST API, Git, AWS — www.weave.team

- Developed a **React-Native iOS App** with 1000+ users that leverages AI to autodetect screenshots, contextually analyze the content, and makes them actionable with relevant links
- Implemented **Redux State Management** to enable low-latency (j50ms) sharing of curated mood boards and clustered the boards with K-Means
